The Sunrise Series Concerts (2011-12)

The *Sunrise Music Series*, in its second full season, is a series of Sunday morning musical offerings hosted by the First Unitarian Society of Westchester with the intention of providing members and visitors from the community with 30-45 minutes of quality weekly listening in a contemplative setting, surrounded by the natural beauty that is visible from the Society's sanctuary room. This year's Bach cycle - open to the public, with free admission - is intended to be a series of informal but well-prepared offerings, as an interim step toward final concert preparation. Weekly printed Programs and accompanying Notes will be provided along with brief introductory comments by the performer. (Downloadable links to Program & Notes files posted for both Sunrise and Masters Series on www.studio-hollywood.com).

J.S. Bach: The Partitas, Well-Tempered Clavier

It is harmonic intensity above all that sets Bach's music apart from that of his contemporaries. Bach had anything but a conventional musical mind. His work is always full of surprises: something unexpected, something that departs from the norm, something that only Bach could have dreamed from the material. In Bach's music a completely new harmonic language is forged, A superior harmonic sense is the mark of nearly all of the great composers, the one thing that sets them off from their more timid and less inventive contemporaries, Where most composers of his day would confine themselves to the rules, Bach *made* the rules. Even as a young man he was industriously investigating the harmonic potential of music, and for this he would be reprieved. His listeners were not used to such daring. At Arnstadt, the twenty-one-year-old Bach was rebuked "for having hitherto made many curious variations in the chorale, and mingled many strange tones in it, and for the fact that the congregation has been confused by it." As he grew older, his harmonic adventurousness only became more and more pronounced. He was considered a contentious man, but also highly respected.

Taking the forms bequeathed to him, Bach was constantly expanding, refining, and improving them. His music for solo string instruments has never been surpassed for ingenuity, complexity, and difficulty. There is also no music in the literature that has Bach's kind of *rightness*, of inevitability, of intelligence, of logically organized sequences of notes. As regards style, if we know one thing about Bach, it is that he was a passionate man and a passionate performer. He undoubtedly played and conducted his own music with infinitely more dash, freedom and spontaneity than modern performance practice will generally admit. The tone should also not be stiff and uniform in quality but organically constructed and articulated, mobile, full of life, just as Bach himself, as amply testified by his contemporaries, "knew how to give such variety to his playing that in his hands every piece was as eloquent as speech".

from The Lives of the Great Composers (Bach), by Harold C. Schonberg

The Partitas – The Partitas, BWV 825–830, are a set of six suites written for harpsichord published from 1726 to 1730 as the *Clavier-Übung I*, and the first of his works to be published under his direction. They were, however, among the last of his keyboard suites to be composed, the others being the 6 English Suites BWV 806-811 and the 6 French Suites, BWV 812-817. The Partitas are the last set that Bach composed and the most demanding of the three. As with the French and English Suites, the autograph manuscript of the Partitas is no longer extant. In keeping with a nineteenth century naming tradition that labeled Bach's first set of Suites *English* and the second *French*, the Partitas are often referred to as the *German* Suites. This title, however, is a publishing convenience, as there is nothing particularly German about the Partitas. In comparison with the two earlier sets of suites, the Partitas are by far the most free-ranging in terms of structure. Unlike the English Suites, for example, which open with a strict prelude, the Partitas each feature a different opening movement styles: No. 1 (Prelude), No. 2 (Sinfonia), No. 3 (Fantasia), No. 4 (Overture), No. 5 (Preambulum) and No. 6 (Toccatà). Like the other suites, however, the remaining movements broadly consist of familiar forms: Allemandes, Courantes/Correntes, Sarabandes, Menuets, and all but one of them (No. 2) concluding with Gigue, with other forms sprinkled in for variety: Rondeau (No. 2), Burlesca (No. 3), Aria (No. 4), Passepied (No. 5), and Gavotte (No. 6). While each of the Partitas was published separately, they were collected into a single volume (1731), known as the *Clavier-Übung I* (Keyboard Practice), which Bach himself chose to label his Opus 1. Unlike the earlier sets of suites, Bach originally intended to publish seven Partitas, advertising in the spring of 1730 upon the publication of the fifth Partita that the promised collected volume would contain two more such pieces. This intention is further signaled by the spread of keys, which follows a clear structure, B-Flat - c, a - D, G - e, leaving F as

the logical conclusion. The Italian Concerto, which is in the key of F and was published in the *Clavier-Übung II*, likely might have originated as one of the Partitas before expanding beyond the dictates of the Suite form; conversely, the French Overture, in B minor, is often referred to as the "Partita" in B minor, and was also published in the same volume.

The Well-Tempered Clavier – Just before he left Cöthen in 1723 Bach completed what we now know as the first book of a collection of 48 preludes and fugues which he entitles *Das wohltemperierte Clavier (The Well-Tempered Clavier)*. The Well-Tempered Clavier, dubbed 'the old testament' by Hans Bulow, is acknowledged to be one of the most significant works for the keyboard ever written. It consists of fugues, each preceded by its own prelude, in all twenty-four keys, twelve major and twelve minor.

The use of the adjective 'well-tempered' in the title implies a tuning whereby all the keys of the pieces in the collection would sound well. Some of the keys included in the WTC were used by Bach only in this work and even as late as 1728 Johann David Heinichen wrote that composers seldom ventured beyond keys such as A-flat and B major, and never wrote in F-sharp or C-sharp major. Bach's purpose in writing in all keys is a matter of speculation and touches on the nature of the tonal system itself.

One of the irregularities of the tonal system is the slight disparity between enharmonically equivalent notes (for example A-flat and G-sharp). This difference has significant consequences in that a tuning which favors one results in the other sounding out of tune. On the keyboard, enharmonically equivalent pitches cannot be distinguished since one key on the instrument represents both notes. This created problems for intonation on keyboard instruments: one can play in tune in a particular key but not necessarily in another unless one retunes the instrument. One solution to this inherent dilemma of intonation on instruments with fixed notes is 'equal temperament'. In equal temperament a compromise is made in which each note is tuned slightly impurely in relation to another. As a result there is an even, thought minimal distribution of 'out-of-tuneness' between all notes in order that none of them should stick out obtrusively. It is generally believed, therefore, that Bach's WTC implies a tuning of the keyboard in equal temperament.

'Well-tempered' does not necessarily imply 'equal temperament', however, but rather an irregular tuning system in which all keys could be tolerated but some keys would be more 'in tune' than others. The idea behind this concept is that a remote key within a piece would sound more dissonant and thereby be given a unique 'character'.

The **Preludes** that precede the fugues in the WTC are not simply introductory pieces, but works which stand on their own. Thought the prelude originated as an improvisation made while lutenists checked the tuning of their instruments, it gradually evolved into a separate, written-out piece. The first prelude of the WTC, with its arpeggiated chords, comes closest in style to the earlier type of improvisatory prelude. The preludes are extremely varied in form and character, giving color and contrast to the set, and may share or contrast in mood with the fugues.

The **Fugues** consists of a principal theme (subject) and an immediate repetition in another voice (answer). The subjects vary enormously. The successive presentation of the principal melodic idea of a fugue is called the 'initial exposition'. There are essentially three types of fugal 'procedure': the first – in which the subject is stated at various times in each of the voices accompanied by free counterpoint; the second – in which the subject is combined with a statement of itself in another voice; and the third – and most frequent procedure in Bach's fugues – in which a distinct theme appears in counterpoint with the subject or its answer throughout the course of the fugue.
